## ORGANIC

A significant portion of our product range is organic.

We collaborate with certified organic suppliers who meet strict requirements for product content, production methods, and environmental and social standards.

Organic farming practices are designed to minimize the impact on the environment, including reducing soil erosion, conserving water, and promoting biodiversity.

## RECYCLED

The Global Recycled Standard (GRS) is an international, voluntary standard for tracking and verifying the content of recycled materials in a final product.

The standard applies to the full supply chain and the certification covers processing, manufacturing, packaging, labelling, trading and distribution of all products.

## THE CE MARK

The CE mark signifies that our products comply with European Union safety, health and environmental protection requirements.

## THREAD COUNT (TC)

TC refers to the number of threads per square inch in a piece of fabric. It is often used to measure the quality of bedding. The higher the TC, the denser the fabric. A higher TC can also result in a softer and more luxurious feel on the skin.

## GRAMS PER SQUARE METER (GSM)

GSM refers to the weight of the fabric per square meter. In the context of terry cloth, GSM indicates its thickness. A higher GSM value typically means a thicker and more absorbent towel, while a lower GSM indicates a lighter towel that may dry more quickly.
